

RESPONSE

Applicant has included another listing of all claims, with amendments being made to original claims 9, 11, 12, and 13. As recommended by the examiner in the last office action, the features described in original claim 11 have been added to original claim 9. Claim 12 has also been amended to reference amended claim 9, instead of original claim 11, which has been deleted. Original claim 13, which discloses the use of a conventional windmill as a water displacement means, has also been deleted.

With these amendments, the Applicants now feels that the application is in condition to be passed into issuance. Applicant has also included a check for \$60.00 for the one month late response fee. Please feel free to contact Applicant if any additional information is needed. Thank you very much.

Sincerely,

Gary Johnston
